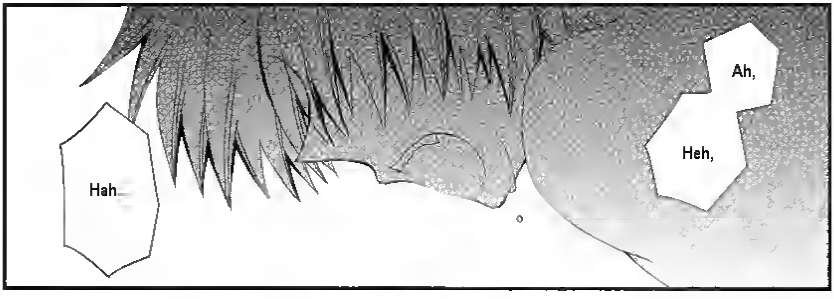
第23話 結界魔法

Ah,
Hah,
.....



Hah...
Heh,
Ah,

such erotic sounds, does it really feel that good?
What!?
How can it feel good, and it wasn't erotic!

Ngh,
Kazuma,

Hurting is a given.
True,
I know that!
And I know there is no other way!
But not matter how much time passes, if it's gonna hurt, it's gonna hurt.
On a body that houses no magical power,
forcibly inserting magical power,
The body wouldn't be eble to beer it, end it would cause interal rejection! They would then become a human firework.
Doing such e crezy thing,
Well, that's the cese for normal people,
you don't need to worry about these things.

Your body,
really isn't simple.
Hah!
HEY! WHAT ARE YOU
The speed at which your body heals itself,
exceeds the speed which the magic destroys it.
Such a strong healing ability is extremely abnormal, normally, this is impossible
So what? Why are we still talking about that!

I apologize,
I don't know why I was angry but I lost control of my magic for a bit.
Hah,
You...
Don't say anything else that would make me lose my concentration
next time I'll lose control of it more
Geh!
This damn deef girl...
Hey, Kazuma...
I keep saying it again and again,
What I said about being "extremely abnormal" and "impossible",
That is praise from one of the top 5

Hah, Hah,
あ
I lost control again.
Seying these things,
It doesn't make me feel eny better
Cen you not be so excessive!
OW OW OW!
Kezume actually said such things.
Ah—
so tired.
ぐた…
I cen't believe it,
The one who should be tired is me, the one who is injecting megic power.

should only be about 1%
Oh right,
you used up about 10% of your magic
That's all in the past
Right, you are an S-rank demon hunter
Huh? Of course not,
I've seen it before, you can annihilate and entire mountain
Huh?

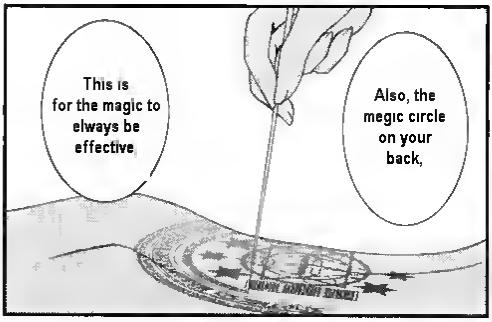
WAH!?
You...
Seal.
If you want to take some blood, tell me first.
I went to do some investigations, let me take some blood
TELL ME FIRST! NOT AFTER! THAT'S DANGEROUS!
I heve e doctor's license,
regarding needles, I cen do it with my eyes closed
That's not the point!

dangarous
What if you accidantly touch my blood
That's
Than what ara you trying to say?
original barriar magic mada spacifically for such situations?
What's that?
You maan to say, you can't trust my spacially mada for you
No, not that
It's not that I don't trust it!

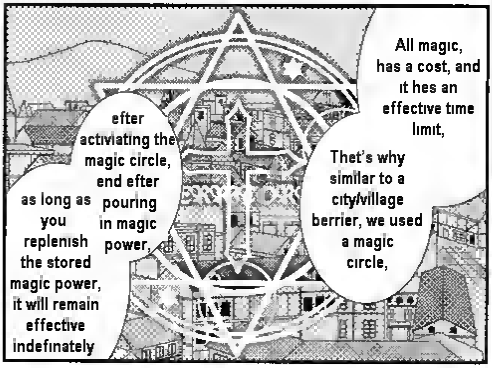
Without your magic,
I
No matter what
I em thenkful to you, and completely trust you,
thanks to your barrier magic,
I can now live e normel life
The blood within my body,
would be e type of poison
so deadly that if you touch it you would be killed

I know that your magic is very complicated,
It's just the whet if, the million in one chance, this danger
not to mention my blood
I cen't ect like I didn't hear this
There is no possibility
This is my originel creation, and e magic thet I cast,
There will be no million in one situetion
You sure ere confident
Nonsense,
I have enough power, of course I'm confident
Don't worry,
During the berrier magic's effective period,
All those situations that you worry about will not happen

Simply put, magic infused blood
Magic infused blood?
I don't really get it

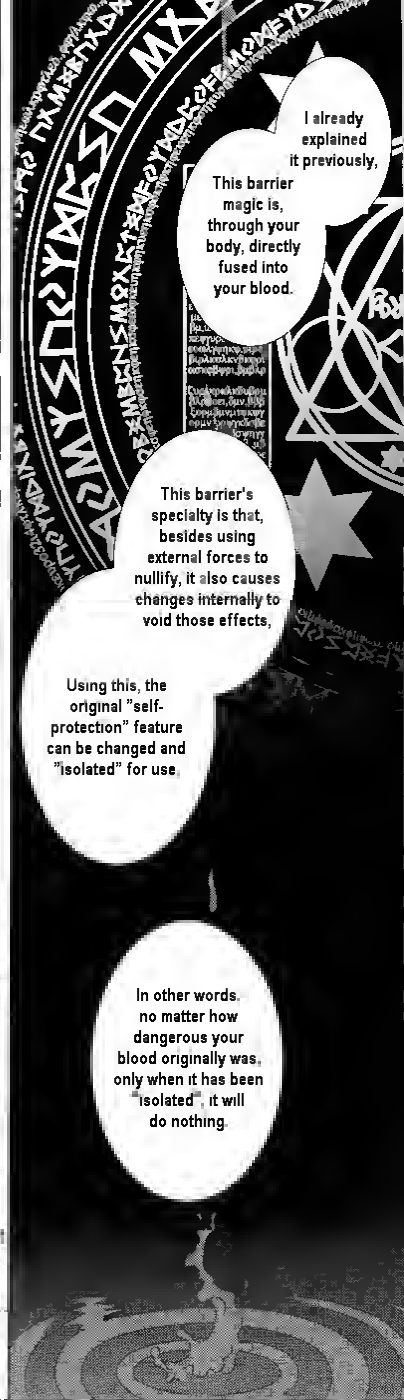


This is for the magic to always be effective
Also, the magic circle on your back,



All magic, has a cost, and it hes an effective time limit,
That's why similar to a city/village berrier, we used a magic circle,
efter activiating the magic circle, end efter pouring in magic power,
as long as you replenish the stored magic power, it will remain effective indefinately

That said, the number of people who use magic circles to activate magic, I've only seen a few.
Magic circles in general are considered powerful magic, but within the realm of magic they are complicate and lack mobility.
And only relatively high level magicians can use them.



I already explained it previously,
This barrier magic is, through your body, directly fused into your blood.
This barrier's specialty is that, besides using external forces to nullify, it also causes changes internally to void those effects,
Using this, the original "self-protection" feature can be changed and "isolated" for use.
In other words, no matter how dangerous your blood originally was, only when it has been "isolated", it will do nothing.

So there won't be that milhon in one chance,
Other than me dispelling it, or it running out of magic power, it will alweys be ective
With the exception that you suffer grave injuries or are injured via a special magic weapon,
otherwise, it will be e beautiful and intact magic.
she reelly is a very capable magician
Right,
Forte mostly activates magic using megic circles.
The magic circle on your beck is similar to that, it's e powerful magic created speficically for you,
During the effect-tive period of the magic, your blood, no matter it's powers, will not have any effects,
It cen't kill anything.
.....
Even though,
what you say is not wrong...
.....
Also, your blood becomes normal after having left your body after a period of time.
I'm not sure exactly why.
So don't worry,

Huh?
Kazume
OW!
You
I wes going to show you how it worked
So lightly biting you doesn't draw blood, I failed,
aren't scered et all?
even though there is magic to prevent it, end there is no danger, but my blood was orignally so deadly you
die on contact, normally put it's abnormal end scary

If you worry all the time like that, you'll become bald
Huh?
That's why I said it wes e beautiful magic, in any case I'm not like you where whenever I touch something I get scared
When heve I been like that
Don't worry,
I said it before,
I will find out thoroughly
"what" Kazuma is
That's why I said
Forte
.....

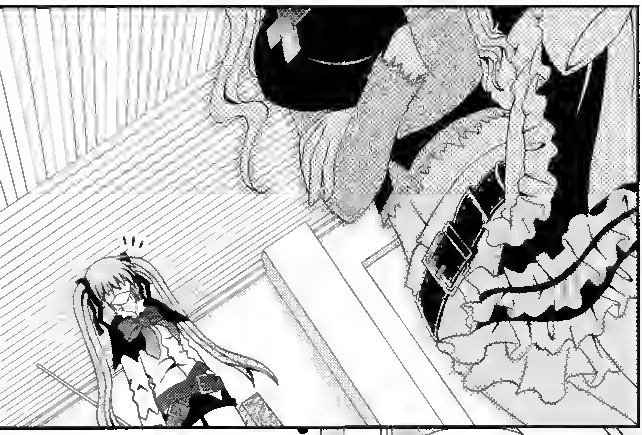
Stingy
HELL NO!
Let me dissect you just once
This hes nothing to do with being stingy or not!
Ah,
You were messing with me again!?
I can't always be here to mess with you,
I heve to go
Bullets, I think the ones you have are elmost used up
Huh?
Almost forgot,
Take this.

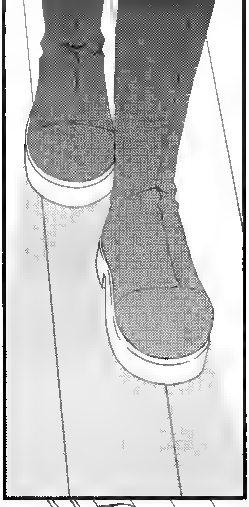
If you don't heve your peyment next month, I'll punish you until you wish you were dead
Got it
What?
You haven't been using your bullets for work, and heve some remaining?
None!
I'm using bullets relentlessly, thank you very much!
Forte,
Then see you later
.....
This
I have to trouble you everytime, I'm really sorry about thet

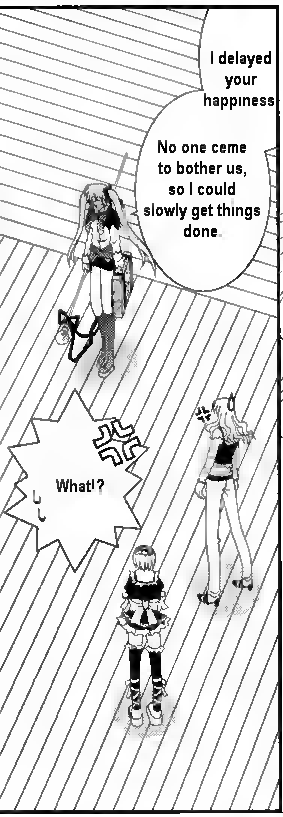
That's because you
are the person who saved me,
treating you better is a given right?
とぅん
Then! The interest that I have to pay every month can you lower it e bit?
This end that are two different issues
……
Instent refusel of your sevior's request
……
Right,
Your,
eye still hasn't heeled yet?

Then why don't you treet it?
.....
Why, are you esking this
.....
I've thought it wierd for e while now,
if you wanted to heal it, it would have already been done
You cen't possibly lack the treament fee,
end using your connections, finding e good doctor should be very easy
Forte?
I feel like your previous month's payment and interest should be compunded every 10 days!
Goodbye!
Huh...
Wai WAIT!
Compounded every 10 days?
Also, what do you meen feels like...?
.....
This matter is not importent

In any case,
compounded every 10 days... no way right?
What did I say, that made her so angry?
What happened to make her mad
So stupid,
You should at least remember what you've said before,
Idiot (baka).







I delayed your happiness
No one ceme to bother us, so I could slowly get things done
What!?

Hah, everything done?

Yue Trans(lations)

Translator: Yue Er

Nothing much to say this time except there are some boss explainations, which confuse the hell out of me. I tried my best, don't blame me if they are a bit off. Anyway, we see a bit of Forte and Kazuma's relationship in this chapter.

Chapter was pretty short page-wise but still pretty heavy on the words. But because this chapter was really short, the next chapter is a whopping 40 pages, which is double this. Damn, I'm gonna start working on it a bit. Yeah....
But of course you gonna have to wait till next Friday to get it. Muahahaha

Oh and I've spoken with visitor######## who did Chaps 14-18. He did upload the missing chaps to Bato.to in case you cared, and I've told him that I'll continue the series.

I'm not so sure about how often the author releases in Japan though, or maybe my Chinese Fan Translator just isn't getting them since it's been 3 months since the last update on my chinese raw site. Well, we have a ton of chaps before we get there so it'll be alright...
